

MANYASHREE T Y

AI/ML Engineer | Full Stack Developer

manyashreety1@gmail.com | [linkedin.com/in/manyashreety](https://www.linkedin.com/in/manyashreety) | github.com/aynamaa

SUMMARY

Engineering graduate with MNC experience at Johnson Controls and mentorships at Microsoft & Morgan Stanley, building full-stack AI applications using React, FastAPI, and LLM frameworks. Hands-on with prompt engineering, LangChain, and FAISS-powered semantic search — with proven ability to ship production-grade systems. Backed by real funded projects, a hackathon win, and a Full Stack Development certification.

SKILLS

- **Languages:** Java · JavaScript · TypeScript · Python · SQL
- **Concepts:** OOPs · Data Structures · DBMS · REST APIs · SDLC · Microservices
- **Frontend:** ReactJS · HTML · CSS · JavaScript · TypeScript · Streamlit
- **Backend:** Node.js · FastAPI · Flask · REST APIs · Postman
- **AI / ML:** LangChain · FAISS · TensorFlow · Scikit-Learn · Pandas · NumPy · Rasa NLU
- **Databases:** PostgreSQL · MongoDB · Firebase · SQL
- **Cloud & DevOps:** AWS (EC2, S3, Lambda basics) · Azure (AutoML, Cognitive Services) · Firebase Hosting · Docker
- **Tools:** Git · GitHub · Power BI · VS Code · Jupyter Notebook
- **Soft Skills:** Communication · Stakeholder Management · Problem Solving · Time Management

PROJECTS

IntelliSaaS · Full-Stack LLM SaaS App · [github/intellisaaas](https://github.com/intellisaaas)

Python · FastAPI · ReactJS · LangChain · FAISS · PostgreSQL · Docker

- Built an end-to-end LLM-powered SaaS platform with React frontend + FastAPI backend — designed for scalability, handling 50+ concurrent API requests via modular REST architecture following SDLC best practices
- Integrated FAISS vector search for semantic document retrieval, reducing query response time by ~40% over keyword-based search
- Deployed containerised services using Docker with clean separation across AI, API, and UI layers — applying cloud deployment and version control practices throughout

AI Chatbot · Conversational AI · Rasa NLU · [github/AI-Chatbot](https://github.com/AI-Chatbot)

Rasa NLU · Python · Node.js · ReactJS · JavaScript · REST APIs

- Developed a full-stack AI chatbot handling 100+ user intents using Rasa NLU with custom entity extraction and multi-turn dialogue management
- Built React-based chat UI connected to Rasa backend via REST API — achieving sub-second response time with zero cloud dependency

Portfolio Website · Full-Stack Web App · [github/portfolio](https://github.com/portfolio)

ReactJS · HTML · CSS · JavaScript · Firebase Hosting

- Designed and shipped a responsive, component-based portfolio using ReactJS — mobile-first layout deployed continuously via Firebase Hosting

WeatherWise · Real-Time Weather App · [github/WeatherWise](https://github.com/WeatherWise)

JavaScript · REST APIs · HTML · CSS · OpenWeatherMap API

- Built a real-time weather app consuming live REST API data — displaying dynamic conditions (rain, cloud, sunlight) with animated UI and an interactive map interface
- Implemented async API integration with structured data parsing and real-time state updates — demonstrating patterns applicable to AI inference workflows and streaming UI

Trolley.AI (Funded) · AI-Driven IoT · Python · TensorFlow · REST APIs · Power BI

- Led AI data pipeline for a funded IoT project; built 3+ Power BI dashboards used by stakeholders to track real-time sensor metrics

Mechaflow (Funded) · Embedded Automation · Embedded C · Microcontrollers

- Delivered a funded embedded automation system end-to-end — from circuit design to deployment — within a 3-month timeline

□ **2nd Runner-Up – Katathon 3.0** · Built a PWA with offline AI capabilities; led a 4-person team to podium finish

EXPERIENCE

Senior Design Engineer · [Johnson Controls \(MNC\)](#)

Aug 2025 – Present

- Managed 5+ Power BI dashboards used by leadership to track project KPIs — improving reporting turnaround by 30%

- Worked with Salesforce & SAP across 3 cross-functional teams (engineering, finance, ops) for real-time operational data tracking and process management
- Drafted technical documentation and status reports for 10+ senior stakeholders — maintaining SDLC compliance and data integrity standards

Mentee – Girls Go Ready · [Microsoft](#)

Dec 2023 – Feb 2024

- Won Microsoft GGR Hackathon 2024 out of 200+ participants — built and presented a cloud-integrated solution in 48 hours
- Gained hands-on exposure to Azure cloud services, product lifecycle management, and enterprise communication workflows

Mentee – Tech Division · [Morgan Stanley](#)

May 2022 – Sep 2022

- Developed structured problem-solving and analytical skills within a global financial institution's technology division

Intern (4-Year Programme) · [Katalyst India](#)

Dec 2021 – 2025

- Completed a sustained 4-year tech mentorship programme — built IoT/automation projects and practised Git-based version control throughout

EDUCATION & CERTIFICATIONS

B.E. Electrical & Electronics Engineering · **Dr. Ambedkar Institute of Technology** · **CGPA: 8.64** 2025

□ **2nd Runner-Up – Katathon 3.0** · Katalyst India · Jan 2024 · [View Certificate](#)

Built a PWA with offline AI capabilities; led a 4-person team to podium finish out of 60+ competing teams — powered by Continental & MathWorks.

Full Stack Development · Internshala Trainings · Jan 2026 · [Verify Certificate](#)

Scored 85% in final assessment covering Intro to Full Stack Development and VS Code tooling. Certificate no: 5moqxmb3zyt.

Cloud Computing & Machine Learning · Microsoft Girls Go Ready · Apr 2024 · [View on LinkedIn](#)

3-month industry mentorship by Microsoft Technical Trainers and Cloud Evangelists — covering Azure, cloud architecture, and ML concepts (Dec'23 – Mar'24).

Introduction to Java · Coding Ninjas · Feb 2024 · [View Certificate](#)

Completed Jan–Feb 2024 — covering Java fundamentals, OOP, and DSA foundations. Certified by Coding Ninjas (instructors: Ankush Singla & Manisha Khattar).
